

Site Network Usage Report

Generated 31 July 2026, 15:28 SAST

PROTOTYPE — sample layout (Variant A)

SITE

Unjani Clinic — Alexandra

CT-UNJ-002 · Unjani Clinics NPC

REPORT PERIOD

June 2026

1 – 30 June 2026 · SAST

Last complete calendar month · Africa/Johannesburg

DOWNLOADED

142.6 GB

UPLOADED

18.4 GB

AVG DL

448.2 Kbps

PEAK BUCKET

980.4 MB

Core site traffic

Primary: Interstellio BNG (PPPoE)

Site-level BNG aggregate for the period. Not SSID-split — Free + Staff + other traffic mixed.

Daily download (GB) — placeholder series · 1–30 June 2026

Device identity

UNJANIALEX2 · RAP2200(F) · SN G1U52HL00261B · Group Unjani · Online

Unjani Wi-Fi breakdown (separate sources — do not sum)

Staff Wi-Fi — NOT DISPLAYING (critical gap)

SSID: Unjani Clinic Staff · Source: CircleTel radio (SSID period bytes)

Why this section is empty:

1. We do not yet store period GB broken down by Wi-Fi SSID (only site/device aggregates).
2. Device Traffic (flow/show/hour) is total AP usage — Free + Staff mixed; no SSID dimension.
3. Clients-tab RATES are live Kbps, not June totals — they must not be used as period usage.
4. Need scheduled STA session-byte rollups by SSID (allow-list Staff + Free WiFi) to unlock.

Why investigate: Staff period usage is the critical CircleTel metric to view alongside Patient Free Wi-Fi (TDX).

Patient Free Wi-Fi

Source: TDX/ThinkWiFi (manual Looker export)

Unique users: 1,842

Login sessions: 6,210

Download: 96.3 GB

Source: TDX/ThinkWiFi (manual export) · 1–30 June 2026 · aggregate/anonymised · may be revised by TDX · do not sum with Staff or BNG totals.

Note: Patient figures alone cannot explain Staff load — Staff section above must be instrumented to compare.
